

## **SAMPLE'S ROASTER TN-1 electric**

Machine designed to roast coffee, cereals, nuts and several products of natural roasting. It has a load capacity from 150gr up to 600gr green coffee beans (density 0,65 Kg/dm<sup>3</sup>) per batch and a production of 4 batches per hour, depending on the type of coffee and desired roasting point. For the roast of different products, one may consult the density of them.

For their design and simplicity, this machine is the appropriate as a sample's roaster or for Coffee-Shop installation which ones sell coffee in front the customers.

It is not necessary any type of installation, only a range of hood and its use and maintenance is very easy. Painting of height temperature glossy black colour, with details in gold colour.

### **Equipment**

Load hopper  
Digital Thermostat  
Cooler  
Sample container  
Chaff drawer

### **Technical Dates**

Production: up to 2kg/h  
Power: 1'5kw  
Consumption: 6'8A  
Tension: 220V 50Hz  
Dimensions:  
Long: 670mm  
Width: 440mm  
Height: 680mm  
Weight: 65kg
