

### **ROASTER TN-2 electric**

Machine designed for roasting coffee, cereals, dry fruits and several products of natural roasting. It has a capacity from 500gr up to 2kg green coffee ( density 0,65 Kg/dm<sup>3</sup>) per batch and a production of 4 batches per hour, depending on the type of coffee, desired roasting point and moisture degree. For the roasting of different products, one may consult the density of them).

For their design and simplicity, this machine is the appropriate as a sample's roaster, for Coffee-Shop installation which ones sell coffee in front the customers or even for Companies which ones want to roast high quality coffees in small quantities.

It is not necessary any type of installation and its use and maintenance is very easy. Painting of height temperature glossy black colour, with details in gold colour.

### **Equipment**

Load hopper  
Digital Thermostat  
Cooler with aspiration  
Sample container  
Chaff collector  
Chaff cleanliness door

### **Technical dates**

<u>Production:</u>	6 - 8 kg / hour
<u>Power</u>	2,84 kw
<u>Consumption:</u>	12.9 A
<u>Tension</u>	220 V – 50/60 Hz
<u>Dimensions:</u>	
Long:	950 mm
Width:	450 mm
Height	820 mm
Weight:	80 Kg
